Dear Researcher,

Invitrogen has revolutionized electrophoresis with E-Gels™ - bufferless, pre-cast, agarose gels designed for fast and convenient electrophoresis. E-Gels™ make electrophoresis at least two-times faster than conventional methods. Now you can get fast electrophoresis and a FREE Invitrogen T-shirt by purchasing a new 0.8% E-Gel™ Starter Pak.

E-Gels™ for all your electrophoresis needs

Whether you are separating small PCR products or large DNA fragments, E-Gels™ will provide you with the consistent resolution you need. E-Gels™ are now offered in 0.8% agarose, in addition to 1.2%, 2%, and 4% agarose. Now E-Gels™ accommodate separation of DNA products ranging from 20 bp to 10 kb. Just refer to the enclosed brochure and choose the percentage that best fits your application needs.

FREE T-shirt with 0.8% E-Gel™ Starter Paks

Now you can receive a FREE Invitrogen T-shirt when you purchase the new 0.8% E-Gel™ Starter Paks. 0.8% E-Gels™ are perfect for applications requiring 800 bp to 10 kb resolution. Each Starter Pak contains an E-Gel™ Base and nine agarose gels. Just mention PROM221 and your shirt size when placing your order to receive your FREE T-shirt. But Hurry! This offer expires August 31, 2000. With the 0.8% E-Gel™ Starter Pak, there's no better time to get started. Call and place your order today.

Product	Quantity	Cat. no.	Price
0.8% E-Gel™ Starter Pak	1 E-Gel™ Base 9 0.8% Gels	G5000-08	\$75

T-Shirt sizes – S, M, L, XL

Sincerely,

Cindy Breed
Product Manager

P.S. Hurry! The FREE T-shirt with the 0.8% E-Gel™ Starter Pak purchase expires on August 31, 2000. Just mention PROM221 and shirt size when placing your order.
