

Silence, Speed, Strength... and remarkable Versatility

Powerful, Fast, and Silent Homogenization of ~~Even~~ the Toughest Biological Samples with the
PowerLyzer™ 24 Bench Top Bead-Based Homogenizer

Silence—replace noisy bead-beaters, polytrons and vortexes with compact, quiet, and “hands-free” homogenization

Speed—homogenize 24 samples at once in seconds

Strength—optimized for use with MO BIO DNA and RNA extraction kits for the fastest, most consistent, and highest-quality homogenization

Versatility—99 customizable settings with 10 cycles each ranging in 2000-5000 rpm in 1-second to 5-minute intervals to ensure less homogenization time, heat generation, and sample degradation

Cat # 13155
